B.S. in Biochemistry

- Fulfills course subject matter requirements in preparation for admission into *medical, dental, pharmacy, and law schools*.
- Curriculum meets recommendation of the *American Society for Biochemistry and Molecular Biology*.
- *Excellent career opportunities:* government (health, food, medicine and forensics); industry (biotech, pharmaceuticals); academic (research, teaching)

Biochemistry is The study of the molecular basis for life; the structure and function of cellular components such as proteins, carbohydrates, lipids and nucleic acids. It provides an understanding of the origin, detection and treatment of disease; insight into genetics; and opportunities to harness the power of biology in new fields (biofuels, biomaterials, nanomedicine, etc).

The curriculum includes a balanced schedule of **chemistry**, **biology** and **biochemistry** courses
