

REU, Graduate School & Fellowship Announcements

Graduate School & Fellowship Opportunities:

Lehigh University

Lehigh University is seeking individuals interested in continuing their graduate work in Chemistry. The university offers multidisciplinary research opportunities in many areas, including: Analytical Chemistry, Biochemistry, Physical Chemistry, Surface Chemistry, Nanoscience, etc. All students receive a competitive stipend and paid tuition. Fellowships are also available to those who qualify.

For more information and to apply, visit: <http://www.lehigh.edu/chemistry>

Summer Research Opportunities:

University of Pittsburgh

Application Deadline: March 9, 2008

Program Dates: May 19 - July 25, 2008

U of Pittsburgh is currently seeking graduate and undergraduate students interested in participating in the 10-week NIH-NSF-sponsored summer research program for the Bioengineering and Bioinformatics Summer Institute. Applications are being accepted in both the sciences and engineering majors. Course work topics include: math and biochemistry review, protein folding, fundamentals of bioinformatics, and molecular-to-cellular simulations.

- Open to U.S. Citizens and permanent U.S. residents. A limited number of spots also may be available for international students.
- Open to first and second year graduate students and junior and senior undergraduate students.
- Undergraduate participant stipend is \$3,200; graduate participant stipend is \$5,000
- Free housing and local transportation are included.

For more info and to apply on-line, visit: <http://www.cbcb.pitt.edu/bbsi>

Graduate Summer Research Program

University of Pittsburgh

Application Deadline: March 9, 2008

Program Dates: May 19 - July 25, 2008

U of Pittsburgh is currently seeking graduate and undergraduate students interested in participating in the 10-week NIH-NSF-sponsored summer research program for the Bioengineering and Bioinformatics Summer Institute. Applications are being accepted in both the sciences and engineering majors. Course work topics include: math and biochemistry review, protein folding, fundamentals of bioinformatics, and molecular-to-cellular simulations.

- Open to U.S. Citizens and permanent U.S. residents. A limited number of spots also may be available for international students.
- Open to first and second year graduate students and junior and senior undergraduate students.
- Undergraduate participant stipend is \$3,200; graduate participant stipend is \$5,000
- Free housing and local transportation are included.

University of Alabama

Application Deadline: March 1, 2008

Program Dates: June 1 - Aug. 9, 2008

U of AL is currently seeking individual undergrad students interested in participating in the NSF- sponsored 10-week summer undergraduate research program in Materials Science and Engineering. Applications are being accepted in both the sciences and engineering majors. Typical research topics include: Spin torque oscillators, magnetization damping in half-metallic films, FePt nanoparticles for high density magnetic recording media, polymer waveguides for explosives detection, and much more.

- Each participant's stipend is \$4,250.
- On-campus housing and travel allowance are included.

For more info and to apply on-line, visit: <http://mint.ua.edu>

University of Georgia

Application Deadline: March 1, 2008

Program Start Date: May 19, 2008

UGA is currently seeking individual undergrad students interested in participating in the 10-week NSF-sponsored summer research program at the Center for Computational Chemistry. This program is designed for undergraduates in chemistry, physics, and mathematics.

- Applicants must have completed a course in physical chemistry and have completed three years of undergraduate study by the start of the program.
- Participant stipend is \$2,000 monthly
- On and off campus housing and a travel allowance of \$400 are included.

For more info and to apply on-line, visit: <http://www.ccc.uga.edu/summer>
